

Whom It May Concern,

I am writing to highly recommend Peyton Miller for employment. During her time with us at the Virtual Athletics League (VAL), Peyton proved to be a remarkable asset to our team, and I am confident she will bring the same level of dedication and excellence to any organization she joins.

Peyton began working with us in a social-focused role in 2023. From the outset, her enthusiasm, professionalism, and genuine care for our clients were apparent. She quickly became an integral part of our team, not only excelling in her role but also contributing positively to our workplace culture.

Peyton's skills are extensive and diverse. With a strong background in illustration, customer relations, event planning, and more, she brings a wealth of experience that makes her exceptionally well-rounded. Her work in the gaming industry, particularly in beta feedback for game development, showcases her ability to adapt and thrive in new technical challenges. She also has a talent for clear communication and strong soft skills, which she used to guide team efforts, set meeting agendas, and steer projects in the right direction.

One of Peyton's key responsibilities was managing social media for our developers, a role in which she was indispensable. Her contributions were vital in maintaining and expanding our contracts with major clients like Meta (Facebook). Additionally, Peyton went above and beyond in her work on shorts and videography production, displaying her commitment to excellence.

Beyond her professional skills, Peyton brings positive energy to the team. She is caring, kind, friendly, and resourceful, making her a pleasure to work with. Her dedication to her work and her team is evident in everything she does.

In summary, Peyton Miller would be an outstanding addition to any team. Her combination of technical skills, social aptitude, and positive attitude makes her well-suited for a wide range of roles and teams. I wholeheartedly recommend her to any organization seeking a talented and dedicated professional.

Sincerely,

Laurel Cuthbert
